

STEP UP! – Professional Day Team Challenge

Date and time: 17 September 2026, 8:30–9:30

Venue: Building K, Faculty of Pharmacy, University of Pécs

Let us kick off this year's Professional Day with energy!

Teams of Pharmacy and Biotechnology students are invited to take part in a stair-running challenge combining speed, accuracy, practical skills, creativity and teamwork.

How does the challenge work?

Teams will start on the ground floor of Building K.

One runner will race up the stairs to the Collaboratory on the fourth floor, where they will complete a practical task involving the accurate use of a two-pan balance.

Once the task has been completed successfully, the team's second runner will race back down to the ground floor and cross the finish line.

Speed alone will not be enough. Accurate task completion, effective teamwork and the enthusiastic support of the whole team will all contribute to success.

Team composition

Each team consists of **five members**:

- **one upward runner**, who runs from the ground floor to the fourth-floor Collaboratory;
- **one downward runner**, who runs back to the ground floor after the task has been completed;
- **a three-member support team**, providing moral and physical support, cheering, encouraging and assisting the runners.

We invite each year group to nominate:

- one team from the Hungarian Pharmacy programme;
- one team from the English Pharmacy programme;
- one Biotechnology student team.

Prizes

All participants will receive some well-deserved treats after reaching the finish line.

Members of the winning team will be offered discounted drinks at the evening Professional Day event.

Special prizes will also be awarded for:

- **the most creative team name;**
- **the best and most imaginative team outfit.**

Gather your five-member team, come up with an unforgettable name and outfit, and show us which year group is the fastest, most accurate, most enthusiastic and best at working together!

Step up and meet us at the starting line!
